*Where to go
on the Internet
to learn
Photography*

*By: Trevor Awalt
Bridgewater Photographic Society*

“Disclaimer”

This presentation is a list of resources and general descriptions, not a complete comprehensive list.

Some of the resources are free and some are paid, as subscriptions or pay per product.

Photography training is a huge industry and can provide additional income for *professionals* (retoucher, photographer, business strategy/manager, etc.). The training can be in many forms; streaming video, podcasts, DVD, eBooks, apps and tools.

Free doesn't necessarily mean mediocre and paid isn't always of the highest quality. You must read reviews and ask opinions of similar skilled photographers who have taken the particular training you are interested in. Do your home work so you spend your money wisely.

Each bit of training you invest in, whether it be your time and/or money, provides many methods, suggestions and recommendations which are not always industry best practices and/or may contradict. Take the information and methods presented that best suits your photography, then evaluate and adopt them based on your results.

Your photography will evolve over time which may require you to revisit and re-evaluate what you have learned, remember learning is a process.

You may ask...

Q. How long or how many hours does it take to become a competent photographer?

A. Some suggest 10,000 hours or 10 years, similar to many other professional discipline. It really depends on how much work you put in and how much you practice whether it be on assignment or personal projects.

If photography is your hobby, then your assignments are the goal of the day which you establish for yourself and all or most of your work is personal projects.

If photography is your business then you also have to concern yourself with the relationships, networking, business aspects as well as the photography. Much more than just technique and creativity.

Here is a link of just one opinion.

<https://fstoppers.com/business/three-stages-becoming-prosperous-photographer-how-long-does-it-take-176977>

Remember training and practice go hand in hand, doing either without the other can make the journey longer or more difficult.

Things to remember:

- manage your investment
- get out and shoot
- and enjoy the journey

The world's largest electronic publishing and discovery platform for magazines, catalogs, newspapers, and other publications. Full versions and samplers are available and some you can download (typically pdf format). Some titles are only there for a short period of time as they were uploaded and in violation of copyright, which when identified is then removed. Create an account, it's free.

Some Examples of What's Available on ISSUU

Some Examples of What's Available on ISSUU

Killer Stock, Inc.

Franklin, TN, United States

I am a photographer who specializes in nature, wildlife, travel, and digital effects. I lead photography tours to exotic destinations like Namibia, Kazakhstan, Botswana, Brazil, China, Costa Rica, Mongolia, and Indonesia where I bring people to the most beautiful places. On my tours, I teach the tour participants how to take the best pictures possible. I've written 25 books on photography including five ebooks (that look great on an iPad).

Ken Koskela Photography

United States

Ken Koskela is a Chicago-based travel photographer who captures subjects in excellent light, whether a dead tree forest in Namibia or a villager in rural China. Although Ken shoots a variety of subjects, he is especially known for his environmental portraits of everyday people, his ethereal landscape images and "human element" pictures that combine people and nature. He loves photographing in Asia and has garnered recognition for his portrait work in Indonesia and China.

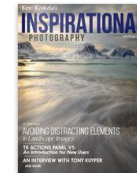

Ken combines his love of photography with over 20 years of travel experience to more than 75 countries in Africa, Asia, Europe and South America. His images appear in books, magazines, travel guides and calendars from around the world. Beyond photography, Ken holds a dual-major MBA in international business and finance and has two decades of experience strengthening financial inclusion in developing countries.

Photography Fundamentals: Understand Aperture, Shutter, ISO+

If you are a photographer, you NEED to know these basic settings and rules - no matter what camera you're using.

★★★★★ 4.6 (1,475 ratings) 21,926 students enrolled

Created by Phil Ebner, Video School Online Inc Last updated 5/2017

🗣 English 🗣 English [Auto-generated]

Preview This Course

Free

Enroll Now

Includes:

- 📺 44 mins on-demand video
- 📄 1 Article
- 🔒 Full lifetime access
- 📱 Access on mobile and TV
- 🏆 Certificate of Completion

What Will I Learn?

- ✓ You will learn how to use the manual settings on your camera to properly expose a photo.
- ✓ You will learn basic composition rules that will automatically improve your photography.
- ✓ You will learn what aperture is, and how to use it creatively.
- ✓ You will learn what shutter speed is, and how to prevent common beginner mistakes.
- ✓ You will learn what ISO is, and how to prevent 'noisy' photos.
- ✓ You will learn about the different photo settings and resolutions.
- ✓ You will understand the basic settings and rules that all pro photographers once learned.

A few examples of “FREE” courses for beginners, new members, or anyone wanting to understand manual mode

Podcasts

What is a Podcast? It can be thought of as a recorded radio show that is made available on the internet as a download or played (streamed) from a website.

- Podcast apps make finding, subscribing, managing and playing podcasts easier.
- They come in many forms such as audio only, enhanced podcasts (audio and pictures), and video.
- Typically free and provide a tremendous value, for learning all aspects of photography and business.
- Due to being free, podcasts come and go and/or change content based on their success

The screenshot shows a podcast player interface. At the top, there's a playback bar with a play button, a progress slider, and a time display of 0:21. Below this is a menu bar with options like File, Edit, Podcast, View, Controls, Account, and Help. The main content area is titled 'B&H Photography Podcast' and features a large image of a camera with the B&H logo. To the right of the image is a 'Subscribe' button. Below the image, there's a section for 'From the Provider' with a description: 'Join us each week for a conversation with insightful and entertaining guests. From gear and technique to history, science and art, we discuss the topics most important to the contemporary photographer.' Below this is a table of episodes.
